OBJECTIVE

Junior back-end developer area

HABILIDADES

SKILLS

For twelve weeks full time, I had the opportunity to participate in a bootcamp, where I learned in practice the routine of a web developer. Throughout this period, I had the opportunity to experience all stages of the software development process, from initial planning to delivery of the final product, using agile methodologies such as Scrum, working as a team and developing my skills. I learned how to maintain and refactor codes and run tests to ensure effectiveness and safety for the user. This experience allowed me to develop valuable practical skills and a deeper understanding of the processes involved in the routine of a software developer.

EXPERIENCES

Internship - 10/2024 – currently

Web Developer | Python Developer | Web Automation & API

Currently, I am a developer at Compila, working on the Motor Fiscal project. My main responsibility is to develop tax automation solutions using Python, focusing on systems integration and optimization of tax processes.
